## SAVE THE DATE FOR THE 2011 VITAGORA® CONGRESS!

## WELLNESS: BALANCE AND DIETARY PLEASURE...

**W**ELLNESS is once more on the menu.

The well-received theme of the 2010 CGNS, "Food, Nutrient and Well-being", organised by the Vitagora<sup>®</sup> innovation network, brought together nearly **550 international participants** of 31 nationalities for a scientific program that was to everybody's taste. The Congress' scientific committee has confirmed their interest in once more delving into this largely unexplored terrain with the new theme for 2011: "**Wellness: balance and dietary pleasure**".

So you must come to **Dijon** on **March 22<sup>nd</sup> and 23<sup>rd</sup>, 2011**, and continue the journey with us. As with each edition of our Congress, **sensory sciences** and **nutrition-health** will be headlining with scientific conferences, oral communications and posters, round tables debates, practical workshops for health professionals and the speaker corner presented by international experts.

It will once again be our pleasure to welcome you to Dijon,

**Christophe de la Fouchardière**

President of the Taste-Nutrition-Health International Congress

### CALL FOR ABSTRACTS

Submissions are open from **October 4, 2010**  
on [www.taste-nutrition-health.com](http://www.taste-nutrition-health.com)

## WHO TAKES PART IN THE CONGRESS?

**COMPANIES** – ingredients and consumer food products, pharmaceuticals and nutritional supplements...

**R&D LABORATORIES AND TECHNICAL CENTRES**, service providers for the food and health product industries.

**RESEARCHERS** in nutrition, health and food technology.

**HEALTH PROFESSIONALS** – doctors, nutritionists, pharmacists...

### THE CONGRESS IN 2011:

#### A quality scientific program!

##### SCIENTIFIC CONFERENCES with international experts

- Nutri-sensing and energetic balance
- Microbiota and intestinal inflammation
- Balance and dietary transition
- Food Reward; implications of liking and wanting

##### ROUND TABLE DEBATES with companies and researchers

- Socio-economic determinants of dietary pleasure
- Wellness and active molecules: the example of wine
- The importance of diet in the management of psychological and metabolic stress
- Gut native and food related microflora and their role on inflammation

##### PRACTICAL WORKSHOPS for health professionals

##### SPEAKER CORNER on regulatory affairs

##### ONE-TO-ONE BUSINESS MEETINGS: confidential and targeted

##### EXHIBITION SPACE to promote your expertise

##### OPTION: EUROPEAN TECHNICAL TRAINING SESSION organised by Welience on March 24, 2011 "Probiotics: scientific advances and new applications"

*The unmissable event for all food and health professionals!*

Agrément Société Française d'Angéologie pour la FMC - Organisme de formation n° 26.21.02252.21
